ERC 112D VSC for Variable Speed Compressor control

Enhance your equipment efficiency with variable speed control

By continuously matching compressor speed with load requirements based on the cabinet's inside temperature and its dynamics, the Danfoss electronic controller ERC 112D VSC for Variable Speed Compressor fulfills key requirements of commercial refrigeration to maintain best food quality while reducing energy consumption.

Up to

40%

energy savings with variable speed vs. fixed speed compressor

Energy savings and environmental protection

Especially designed for bottle coolers and commercial fridges and freezers where a variable speed compressor is installed, the ERC 112D VSC brings greater efficiency, precision and simplicity. Approved for hydrocarbon refrigerants, it is particularly suited for OEM customers where time, easy and reliable installation and high quality need to go hand in hand with flexibility.

Technical specifications

Power Supply	100 - 240 V a.c. Switch mode power supply. Average 0.7 W
Input	Customizable inputs
Output	Frequency output for variable speed control and 4 relay outputs
Probes	Compatible with Danfoss NTC sensors and ECO accessories
Connectors	Standard tab with optional plug
Programming	Customization and mass programming allowed with Danfoss PC software
Mounting	Front and rear mounting possible
Display	Large LED display with multi-functionality icons
Keypad	Integrated keypad for easy interface
Refrigerants	Approved for R290/R600a end-use applications
Environmental protection	IP65 on the front

The variable speed control logic along with best-in-class features to automate

Capacity Modulation

up using a frequency of 0-200Hz signal output to save energy and match load fluctuations very accurately. This helps in faster pull-down and improved operation in varying load conditions.

Single hardware solution

applications. Simplicity to shorten

Built-in reliability

Built to last, withstanding high compressor in-rush loads and having our relays are suitable for use with flammable refrigerants like R290 (Propane) & R600a (Isobutane).

Technology

ERC 112D VSC is able to control the variable speed compressor with a frequency control output through an S4 port, which delivers a 5V frequency signal with a range of 0-200 Hz.

Accessories

- NTC sensors
- ECO accessories
- Gateway
- KoolProg software
- Docking station

For details on specifications, programming, wiring diagram, and accessories code numbers, please see the **ERC 112D VSC User Guide**
