Danfoss Position on RoHS regulations in EU and China

Danfoss strives to avoid using hazardous substances and not exceeding the threshold levels as specified in applicable RoHS regulations (Restriction of Hazardous Substances).

A range of Danfoss products are either in direct or indirect scope of EU RoHS ([Directive 2011/65/EU](#) including amendment 2015/863 (EU) and delegated acts) or China RoHS (Administrative Measures for the Restriction of the Use of Hazardous Substances in Electrical and Electronic Products, MIIT/2016).

However, only the products and components for which Danfoss specifically has declared RoHS compliance can be assumed to be RoHS compliant as stated in the declaration for the specific product. Please be aware that the relevant exemptions listed in Annex III or IV of EU RoHS might be applied.

Available Danfoss RoHS compliance declarations:

- For Danfoss EEE products (Electrical and Electronic Equipment) in direct scope of EU RoHS, Danfoss will issue an **EU Declaration of Conformity** and CE mark the EEE. The EU Declaration of Conformity provides the RoHS compliance status of the specific Danfoss product or component.
- For Danfoss components in indirect scope of EU RoHS (i.e. components to be integrated in an EEE in direct scope of EU RoHS), Danfoss will issue a **Manufacturer's Declaration** providing the EU RoHS compliance status of the specific Danfoss product or component.
- For Danfoss components in scope of China RoHS, Danfoss will issue a **China RoHS Manufacturer's Declaration** providing the China RoHS compliance status of the specific Danfoss product or component.

Conformity assessment methods:

- As a rule, compliance is declared based on the harmonized standard EN IEC 63000:2018 and its methods according to Article 4.3.2, 4.3.3(a) and 4.3.4. This means that the assessment is based on collection and evaluation of supplier declarations and/or contractual agreements with Danfoss suppliers.

We trust that the above will satisfy your inquiry into Danfoss' compliance with EU and China RoHS regulations.

In case you have any comments or questions please contact your Danfoss sales representative.
